## INTRODUCTION

Please insert title as "Sample Layout for 80 x 120 cm poster. Keep it simple, no more than 300 words in total:

This example is to demonstrate the layout of an example poster for presentation at the AfWASA Congress. The purpose of a poster paper presentation is to promote informal discussion. It is a graphic display of a written manuscript. The poster presentation stands by itself a summary of research and usually contains an overview of research objectives, experimental methods, materials, results and a discussion. Often in poster presentations, a clear message in less words is more effective.

The example is to demonstrate the layout of an example poster for presentation at the 22<sup>nd</sup> AfWASA ICE2025 in Kampala.

The colour palette should be as presented (AfWASA blue – RGB:2/33/148), font should be Time New Romans (Title = 80 points – blue, Author names = 36 points – blue, Affiliation = 28 points – blue, Chapter title – 54 points – blue, Text = 24 points – black aligned to the left, Captions and text remarks about figures = 20 points – black aligned to the left). Use graphs whenever its possible but do not overkill information per graph. Avoid very large tables, present them only with horizontal lines.

## METHODS

The key message is: An interested individual who is not necessarily familiar with your field of expertise should be able to follow your poster. The purpose of poster paper presentations is to promote informal discussion. To achieve your goal you'll need to two things:

- A clear message (imagine a poster as an illustrated abstract);
- An attractive and clear layout.

This template is a tool you should use to make the best out of your poster. We provide the attractive layout and the guidance, you provide the content and the best of your work.

Each paragraph should have more than 2 sentences and less than 5 sentences. Each sentence shouldn't have more than 30 words. Use bullet points whenever it is possible, your audience will read them and discuss them with you. Use figures to structure your message and to show your key findings.

Focus on the key questions you want to answer. Begin by answering the "Why?" are you working on this followed by, "What am I adding?", "How? Methods", "What did I find?" and "What do I recommend?"

The clear areas between paragraphs and chapters are valuable. A direct message presented using a clear structure is easier to read and will attract your audience [1].

## DISCUSSION

Table 1 – How to build a table for a poster

	Title		
Value 1	1	2	3
Value 2	4	5	6
Value 3	7	8	9
Value 4	10	11	12

This table only shows key figures, it is light and easily understandable and self explanatory. The side box only gives some hints on what is in the table

Fill with text .....

Figure 1 – How to build a graph for a poster

This figure shows trends, it is light and easily understandable and self explanatory. The side box only gives some hints on what is in the figure.

Use figures to support your text. The average visitor will pay more attention to figures than to text, keep it short and simple.

## RESULTS

Fill with text....

$$\varphi = \frac{1}{\sqrt{2\pi\sigma}} e^{-\frac{(x-\mu)^2}{2\sigma^2}}$$

Figure 1 – How to insert a figure (source: AfWASA)

The pictures are used to show key points of the research. You should use them but avoid resolution overkill, more than 150 dpi but less than 300 dpi.

Save photos as .jpg or png (graphs as png) and take into account that web images are usually poor resolution.

If the picture is not yours, acknowledge the intellectual property of it.

## CONCLUSIONS

Finish with a brief conclusion. Summarize your findings and list the key points of your research.

- Be brief and direct
- This shows the outcome of all of your efforts
